<b>Foreword by Clifford Asness</b>	xi
<b>Acknowledgments</b>	xvii
<b>Abbreviations and acronyms</b>	xix
<b>PART I OVERVIEW, HISTORICAL RETURNS, AND ACADEMIC THEORIES</b>	<b>1</b>
<b>1 Introduction</b>	<b>3</b>
1.1 Historical performance	7
1.2 Financial and behavioral theories: A brief history of ideas	9
1.3 Forward-looking indicators	13
1.4 View-based expected returns	15
1.5 General comments about the book	16
1.6 Notes	20
<b>2 Whetting the appetite: Historical averages and forward-looking returns</b>	<b>23</b>
2.1 Historical performance since 1990	24
2.2 Sample-specific results: Dealing with the pitfalls	27
2.3 Forward-looking return indicators	32
2.4 Notes	35
<b>3 The historical record: The past 20 years in a longer perspective</b>	<b>37</b>
3.1 Stocks	39
3.2 Bonds	43
3.3 Real asset investing and active investing	47
3.4 FX and money markets	50
3.5 Real return histories	52
3.6 Notes	52
<b>4 Road map to terminology</b>	<b>57</b>
4.1 Constant or time-varying expected returns?	57
4.2 Rational or irrational expectations formation?	58

4.3	Return measurement issues	59
4.4	Returns in what currency?	60
4.5	Risk-adjusted returns	61
4.6	Biased returns	63
4.7	Notes	63
<b>5</b>	<b>Rational theories on expected return determination</b>	<b>65</b>
5.1	The old world	66
5.2	The new world	68
5.3	Detour: a brief survey of the efficient markets hypothesis	81
5.4	Notes	83
<b>6</b>	<b>Behavioral finance</b>	<b>87</b>
6.1	Limits to arbitrage	87
6.2	Psychology	89
6.3	Applications	98
6.4	Conclusion	106
6.5	Notes	107
<b>7</b>	<b>Alternative interpretations for return predictability</b>	<b>111</b>
7.1	Risk premia or market inefficiency	111
7.2	Data mining and other “mirage” explanations	112
7.3	Notes	115
<b>PART II</b>	<b>A DOZEN CASE STUDIES</b>	<b>117</b>
<b>8</b>	<b>Equity risk premium</b>	<b>119</b>
8.1	Introduction and terminology	119
8.2	Theories and the equity premium puzzle	120
8.3	Historical equity premium	122
8.4	Forward-looking ( <i>ex ante</i> objective) long-term expected return measures	128
8.5	Survey-based subjective expectations	141
8.6	Tactical forecasting for market timing	144
8.7	Notes	149
<b>9</b>	<b>Bond risk premium</b>	<b>153</b>
9.1	Introduction, terminology, and theories	153
9.2	Historical average returns	157
9.3	Alternative <i>ex ante</i> measures of the BRP	160
9.4	Yield curve steepness: important predictive relations	161
9.5	Explaining BRP behavior: first targets, then four drivers	164
9.6	Tactical forecasting—duration timing	174
9.7	Notes	177

<b>10 Credit risk premium</b>	179
10.1 Introduction, terminology, and theory	179
10.2 Historical average excess returns	183
10.3 Focus on front-end trading—a pocket of attractive reward to risk	188
10.4 Understanding credit spreads and their drivers	191
10.5 Tactical forecasting of corporate bond outperformance	198
10.6 Assessing other non-government debt	199
10.7 Concluding remarks	204
10.8 Notes	205
<b>11 Alternative asset premia</b>	207
11.1 Introduction to alternatives	207
11.2 Real estate	210
11.3 Commodities	219
11.4 Hedge funds	226
11.5 Private equity funds	241
11.6 Notes	245
<b>12 Value-oriented equity selection</b>	249
12.1 Introduction to dynamic strategies	249
12.2 Equity value: introduction and historical performance	251
12.3 Tweaks including style timing	258
12.4 The reasons value works	261
12.5 Does the value strategy work in equities beyond individual stock selection or in market or sector selection in other asset classes?	265
12.6 Relations between value and other indicators for equity selection	267
12.7 Notes	268
<b>13 Currency carry</b>	271
13.1 Introduction	271
13.2 Historical average returns	272
13.3 Improvements/refinements to the baseline carry strategy	276
13.4 Why do carry strategies work?	282
13.5 Carry here, carry there, carry everywhere	288
13.6 Notes	290
<b>14 Commodity momentum and trend following</b>	293
14.1 Introduction	293
14.2 Performance of simple commodity momentum strategies	294
14.3 Tweaks	298
14.4 Why does momentum—such a naive strategy—work?	299
14.5 Momentum in other asset classes	301
14.6 Notes	305
<b>15 Volatility selling (on equity indices)</b>	307
15.1 Introduction	307
15.2 Historical performance of volatility-trading strategies	311

---

15.3	Tweaks/Refinements	314
15.4	The reasons volatility selling is profitable	315
15.5	Other assets	319
15.6	Notes	319
<b>16</b>	<b>Growth factor and growth premium</b>	<b>321</b>
16.1	Introduction to underlying factors in Chapters 16–19	321
16.2	Introduction to the growth factor	327
16.3	Theory and evidence on growth	328
16.4	Asset market relations	331
16.5	Time-varying growth premium	338
16.6	Notes	338
<b>17</b>	<b>Inflation factor and inflation premium</b>	<b>341</b>
17.1	Introduction	341
17.2	Inflation process—history, determinants, expectations	345
17.3	Inflation sensitivity of major asset classes and the inflation premium	350
17.4	Time-varying inflation premium	356
17.5	Notes	356
<b>18</b>	<b>Liquidity factor and illiquidity premium</b>	<b>359</b>
18.1	Introduction	359
18.2	Factor history: how does liquidity itself vary over time?	362
18.3	Historical evidence on average liquidity-related premia	365
18.4	Time-varying illiquidity premia	370
18.5	Note	374
<b>19</b>	<b>Tail risks (volatility, correlation, skewness)</b>	<b>375</b>
19.1	Introduction	375
19.2	Factor history	378
19.3	Historical evidence on average asset returns vs. volatility and correlation	380
19.4	Theory and evidence on the skewness premium	389
19.5	Verdict on why high-volatility assets fare so poorly	392
19.6	Time-varying premia for tail risk exposures	395
19.7	Notes	396
<b>PART III BACK TO BROADER THEMES</b>		<b>399</b>
<b>20</b>	<b>Endogenous return and risk: Feedback effects on expected returns</b>	<b>401</b>
20.1	Feedback loops on the direction of risky assets	401
20.2	Feedback loops on less directional positions	403
20.3	Agenda for market timers and researchers	405
20.4	Notes	407

<b>21 Forward-looking measures of asset returns</b>	409
21.1 Popular value and carry indicators and their pitfalls	410
21.2 Building blocks of expected returns	413
21.3 Notes	416
<b>22 Interpreting carry or non-zero yield spreads</b>	419
22.1 Introduction	419
22.2 Future excess returns or market expectations?	420
22.3 Empirical horse races for various assets	424
22.4 Conclusions	428
22.5 Notes	429
<b>23 Survey-based subjective expected returns</b>	431
23.1 Notes	435
<b>24 Tactical return forecasting models</b>	437
24.1 Introduction	437
24.2 What type of model?	438
24.3 Which assets/trades?	441
24.4 Which indicator types?	442
24.5 Enhancements and pitfalls	443
24.6 Notes	444
<b>25 Seasonal regularities</b>	445
25.1 Seasonal, cyclical, and secular patterns in asset returns	445
25.2 Monthly seasonals and the January effect	446
25.3 Other seasonals	453
<b>26 Cyclical variation in asset returns</b>	457
26.1 Typical behavior of realized returns and <i>ex ante</i> indicators through the business cycle	458
26.2 Typical behavior of realized returns and <i>ex ante</i> indicators across different economic regimes	461
26.3 Notes	465
<b>27 Secular trends and the next 20 years</b>	467
27.1 Contrasting 1988–2007 with 1968–1987	467
27.2 Reversible and sustainable secular trends	468
27.3 The next 20 years	474
27.4 Notes	478
<b>28 Enhancing returns through managing risks, horizon, skill, and costs</b>	479
28.1 Introduction: how can investors enhance returns?	479
28.2 Risk	482
28.3 Investment horizon	492
28.4 Skill	496
28.5 Costs	499
28.6 Notes	501

<b>29 Takeaways for long-horizon investors</b>	503
29.1 Key takeaways from theory	504
29.2 Empirical return sources	504
29.3 My take on key debates	506
29.4 Know thyself: large long-horizon investors' natural edges	512
29.5 Institutional practices	513
29.6 Notes	514
 <b>APPENDICES</b>	 515
 <b>A World wealth</b>	 515
A.1 Global total	516
A.2 Asset class detail	516
A.3 Notes	518
 <b>B Data sources and data series construction</b>	 519
B.1 Asset class and sector returns	519
B.2 Strategy style returns	521
B.3 Factor proxies	522
B.4 Forward-looking yields and spreads	523
B.5 Survey data and expected inflation	523
B.6 Miscellaneous other	524
 <b>Bibliography</b>	 527
<b>Index</b>	551
